**TIS-BallMax**

# TIS - BallMax

## The advantages of BallMax

Over several years we developed **BallMax**, a tool to pick up not only common tennis balls in a quick and comfortable manner, but also the red and yellow Stage 3-kids balls. This makes collecting tennis balls fun for children!

Further merits of **BallMax**:

Collecting balls is time consuming. You will gain more training time by using the time-saving **BallMax**.

Using a cool tool children will be enthusiastic to participate in the collecting work. The **BallMax** is flexible thanks to the practical 3-stage-telescopic function and can easily be adapted to the height of the children. Even the smallest athletes can collaborate. But adults will also appreciate this flexibility.

Tennis coaches usually need a lot of equipment to carry out the training session. In addition to the ball trolley and racket bag, the unwieldy collecting tubes are often a nuisance. For training by now different collecting tube systems for adults and children have been necessary. The **BallMax** combines two ball sizes and can also be reduced to a more practical length for transport.

Due to its construction, the **BallMax** can easily be dismantled and cleaned of sand and dirt. The surface of the main tube can ideally be used as an advertising surface.

## Technical specification

UV-resistant materials

Capacity: Standard adult size 19 balls, Stage 3-kids balls in two stages for either 10 or 16 balls

Length: Level 1 = 50 cm, Level 2 = 80 cm, Level 3 = 115 cm, Diameter: 10 cm, Weight: 1 kg
